ABOUT THE CHAIRMAN

THE CHAIRMAN'S MESSAGE

I started my journey in jeans manufacturing in the year of 2001 as an intern in one of the most reputable jeans manufacturer in Istanbul. The way a pair of jeans goes through, great endeavors of the employees from bottom to the top amazed me and made me more curious and passionate about this industry.

Then new opportunities led me go to Guangzhou, China to grow my business, open up own manufactory as partnership in Shunde Town of Foshan and be among the outstanding exporters to Europe, USA, Russia. Ultimately I reached at my highest level of my experience in China and gained about 20 years of solid experience in this Industry.

After staying in China for long years, the time came for me to return home country, Turkey to make new investment after selling the shares. Jeans manufacturing is my never ending passion and I am a strict follower of the innovations and trends.

I welcome clients for their cooperation and trial orders from Istanbul, Turkey. I will be assigning all infrustrcures to meet the requirements for sampling and production. Me and my team will do what needs to be done for your procurement requirements.

Stay with Fashion, Stay with Jeans
